I want to build my own cat condo but how?

I want to get a kit that has every thing that I need dose anyone now where I can get this!

I made mine with a fence post and plywood and covered it all with carpet applied with liquid nails and a staple gun.

On top, it had an open triangle, about a foot below was a platform with a hole in it, and a couple feet below that was another platform with a hole in it going the other direction. The base was a thicker piece of plywood.

I also hung toys off each platform.

It lasted for years! I copied one I saw in a pet store.
