# **Kitty Condo: The Ultimate Gift Cats Can Enjoy**

Kitty condo or cat condo is a covered house or play space for cats. This structure serves various purposes; it can be your feline's space for playing, relaxing, sleeping and hiding. An owner can place a kitty condo indoors or outdoors. A condo meant for outdoors will provide your favorite feline a comfortable place to stay when it is snowing, raining or when the sun is scorching.

There is a wide selection of cat condos guaranteed to make your pet happy and comfortable. These houses vary in designs, features, sizes and colors. Whether your penchant is for simple houses or for structures with a lot of features, you are sure to find the perfect one for your babies. Some houses have sisal poles, which your cats can enjoy scratching, while keeping their claws trimmed and healthy. There are also condos with box perch, which offers your kitty a great place to relax and the finest spot to view her surroundings. There are also some condos that include a cat toy designed to give any feline occupied in sheer delight.

There are some premium cat houses available that are sure to spoil any feline, and an example is a kitty condo composed of multiple levels. Some of these condos are six feet tall and have all the features felines may need for playing, exercising and lounging. These types of condos also give an ample amount of space to accommodate cat activities such as climbing and perching. With all the activities your cats can do on these, they will be content and occupied, and they will also get their much needed physical activity.

If you are in the market for a kitty condo, it is critical that you assess the quality of the product you are purchasing, to ensure that you are getting the best value for your money. A condo made from real wood is a great choice as opposed to one made from particle board or compressed wood chips. One other component to examine in order to determine the good quality of the condo is the carpet. Look for a kitty condo with thick, lush carpet, because it is a more comfortable and luxurious home for your kitty, and it is also more hard-wearing too.

When buying a kitty condo, other than considering quality, you should also consider your budget, the size of your cat and if you have the place to put it. Make sure to check the product specifications, because depending on the size, a condo can have a room for one small cat, or it can accommodate multiple big cats. If you have a small space in your house, but you have a big cat, there are compact cat condos that can house big cats, so make sure to look out for those. Low price does not essentially mean poor quality; you can get a good quality cat house at a reasonable price.
